

SAFETRAN-CSRS Life Rescue Protectors (Confined Space, High-Angle, Hazmat, Security-EMT)

About Our Team:

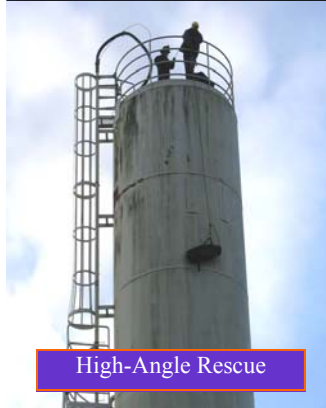

All team members are certified by the California State Fire Marshal (Cal EMA, CSTI,) in accordance with Confined Space Rescue, and Hazmat Response Operations. We conduct rescue and standby operations per State and Federal Occupational Safety and Health Administration (OSHA), procedures for emergency rescue and response.

SAFETRAN-CSRS deploys equipment and techniques for the safe navigation of hazardous environments. This includes atmospheric air testing, rope access (emergency lifelines), SCBA, emergency medical technicians (EMTs), air ventilation all in accordance with OSHA.

Our mission is to ensure the safety of all participants during high-hazard events, at elevation, subterranean, or IDLH environments. Our personnel understand the procedures for security, safe entry, standby and rescue. We conduct regular drills of emergency procedures for Rope Access, Confined Space Rescue, and Hazmat Incident Response.
